

GE Energy is at work connecting people and ideas everywhere to create advanced technologies for powering a cleaner, more productive world. With more than 100,000 employees in over 100 countries and a diverse portfolio of product and service solutions, our deep industry expertise is helping customers solve their challenges locally. We touch all areas of the energy industry including coal, oil, natural gas, and nuclear energy; renewable resources such as water, wind, solar, and biogas, as well grid modernization and energy management technologies. We also offer integrated solutions to serve energy and water intensive industries such as mining, metals, marine, petrochemical, food & beverage, unconventional fuels, and other industrial sectors.

GE Oil & Gas

GE is a provider of advanced technology equipment and services for an array of segments of the oil and gas industry, from drilling and production, liquefied natural gas (LNG), pipelines and storage to industrial power generation, refining and petrochemicals. We also provide pipeline integrity solutions, including inspection and data management, and design and manufacture wire-line and drilling measurement solutions for the oilfield services segment. Our Oil & Gas team leverages technological innovation from other GE businesses, such as Aviation and Healthcare,

to continuously improve oil and gas industry performance and productivity. GE Oil & Gas employs more than 33,000 people worldwide and operates in over 100 countries.

- Drilling & Surface
- Global Services
- Measurement & Control
- PII Pipeline Solutions
- Subsea Systems
- Turbomachinery

GE Power & Water

With a broad array of power generation and energy delivery technologies, GE works in all areas of the energy industry—including renewable resources such as wind and solar; biogas and other alternative fuels; and coal, oil, natural gas and nuclear energy. Our Power & Water team also develops advanced technologies to help solve the world's most complex challenges related to water availability and quality. Numerous products are qualified under ecomagination,

GE's initiative to aggressively bring to market new technologies that will help customers meet pressing environmental challenges.

- Thermal Products
- Water & Process Technologies

GE Energy Management

As global energy demand grows, our customers are looking for greater efficiency and more use out of their assets. At GE, we are investing in innovative technologies that help our customers meet these challenges in sustainable ways. GE Energy Management designs leading technology solutions for the delivery, management, conversion and optimization of electrical power for customers across multiple energy-intensive industries. GE has invested more than \$4 billion in our Energy Management

capabilities, with 14 strategic acquisitions and joint ventures that enable GE to increase its offerings to the utility, industrial, renewables, oil and gas, marine, metals and mining industries. With 26,000 team members in local offices around the world, GE is at work creating advanced technologies and products that deliver the best value for our global customer base.
